

## OKLAHOMA SECTION MEETING

Thursday September 22, 2011

### **“World Class Lube Program at Tinker AFB, OK ”**

*Johnny Dillon, AFMC Reliability Council Chairman – Tinker Air Force Base*

Johnny Dillon has been in the oil industry most of his life, and has spent the last 15 years analyzing lubrication for the U.S. Air Force at Tinker Air Force Base in Oklahoma City – recommending lubricants for everything from \$200 compressors to multi-million dollar systems from worldwide manufacturers. He is an STLE Certified Lubrication Specialist, has several predictive technology certifications including Level 2 Infrared Technology, Level 1 Vibration and Level 1 Ultrasound, and also holds an Advanced Ferrographer certification. He is the co-author of the Air Force’s Reliability Handbook for Industrial Plant Equipment and Facilities, and is the Administrator for the Air Force’s web site on Reliability for Industrial Plant Equipment. He was a past Vice President of the Oklahoma Predictive Maintenance Users Group (OPMUG) and has served on the OPMUG Board of Directors for 10 plus years.
