

Rolling Element Bearings: Call for Abstracts

The Rolling Element Bearing Technical Committee is soliciting papers and presentations for the 81st STLE Annual Meeting & Exhibition.

While all aspects of rolling element bearing technology are welcome, those related to current challenges in practical bearing applications and new technology innovations addressing these challenges are of particular interest.

Such topics may include, but are not limited to:

- Bearing reliability analysis & life prediction
- Noise and Vibration issues in bearings
- Modeling and design analysis
- Case studies of challenging bearing applications and their solutions
- Bearings issues in the Automotive, Aerospace, Power Generation and Heavy industries
- Low torque bearings and/or large size bearings
- Impact of lubrication on bearing performance
- The effect of contamination and bearing cleanliness

For more information and to submit your abstract, visit www.stle.org/annualmeeting.
