ADVERTISERS INDEX

Events like STLE's 2019 Annual Meeting & Exhibition would not be possible without the generous support of advertisers and sponsors. The society would like to extend its thanks to the companies listed below whose advertising support contributed substantially to the production of this Program Guide. Almost all of these organizations are here in Nashville with a booth in the trade show.

DOVERPHOS EP-425

Polymeric Phosphite Ester
for Metalworking Applications

DOVERPHOS EP-425, developed by Dover Chemical Corporation, is a revolutionary patented polymeric phosphite ester that excels in all metalworking applications.

Not only can it be incorporated in neat oils, but due to its strong resistance to hydrolysis, it can be used in various water-soluble coolants and semi-synthetic fluids.

ADVANTAGES AND BENEFITS

- ▶ Light color and very low odor
- ▶ Stable in a wide variety of mineral oils, synthetic oils, and esters
- ▶ Extremely low acidity, thus reducing the possibility of staining to nonferrous alloys
- ▶ High Viscosity Index (VI) providing excellent boundary film at elevated temperatures
- ▶ Globally registered and REACH registered

PERFORMANCE ASPECTS

- ▶ Provides 30% reduced 4-Ball scar diameter compared to sulphurised esters
- ▶ Provides 30-40% reduced 4-Ball scar diameter compared to other phosphite and phosphate esters
- ▶ Higher efficiency over chlorinated, sulphurised, and other phosphorus-containing additives in drawing of carbon steel and stainless steel
- ▶ Can be used as an alternative to chlorinated additives in tapping carbon steel operations
- ▶ Can be used as an ashless alternative to ZDDP (Zinc Dialkyldithiophosphate)

**ACC IS WHERE PARTNERSHIP & TECHNOLOGY MEET
DEVELOPING INNOVATIVE METALWORKING ADDITIVES**

Our capabilities include formulating, new product introductions, just in time inventory efficiencies, and our overall knowledge and expertise in the Metalworking Industry. Because we manufacture many of our own products, we have the ability to customize our surfactant packages and metalworking fluid additives towards each customer's requirements and needs. Our goal is that you find Advanced Chemical Concepts, Inc. the easiest to work with, the most helpful, and the most innovative chemical supplier in the market.
